CONTENTS

Number 1

M. V. Cheshire. Origins and stability of soil polysaccharide 1

A. P. Hamblin, and D. B. Davies. Influence of organic matter on the physical properties of some East Anglian soils of high silt content 11

A. P. Hamblin. Structural features of aggregates in some East Anglian silt soils 23

R. L. Parfitt, V. C. Farmer, and J. D. Russell. Adsorption on hydrous oxides. I. Oxalate and benzoate on goethite 29

R. L. Parfitt, A. R. Fraser, J. D. Russell, and V. C. Farmer. Adsorption on hydrous oxides. II. Oxalate, benzoate and phosphate on gibbsite . . 40

R. E. White, and A. W. Taylor. Effect of pH on phosphate adsorption and isotopic exchange in acid soils at low and high additions of soluble phosphate 48

J. C. Ryden, J. K. Syers, and J. R. McLaughlin. Effects of ionic strength on chemisorption and potential-determining sorption of phosphate by soils 62

J. C. Ryden, J. R. McLaughlin, and J. K. Syers. Mechanisms of phosphate sorption by soils and hydrous ferric oxide gel 72

R. Van Bladel, and A. Moreale. Adsorption of herbicide-derived *p*-chloroaniline residues in soils: a predictive equation 93

R. J. Gilkes. Factors influencing the release of copper and zinc additives from granulated superphosphate 103

R. Miedema, and W. Van Vuure. The morphological, physical and chemical properties of two mounds of *Macrotermes bellicosus* (Smeathman) compared with surrounding soils in Sierra Leone 112

Arieh Singer. Extractable sesquioxides in six Mediterranean soils developed on basalt and scoria 125

H. Eswaran, G. Stoops, and C. Sys. The micromorphology of gibbsite forms in soils 136

D. C. Bain. The weathering of chloritic minerals in some Scottish soils . 144

R. W. Fitzpatrick, and J. Le Roux. Mineralogy and chemistry of a Transvaal black clay toposequence 165

C. Williams, and J. H. Rayner. Variability in three areas of the Denchworth soil map unit. III. Soil grouping based on chemical composition . . 180

R. Webster. Canonical correlation in pedology: how useful? 196

Number 2

C. E. Mullins. Magnetic susceptibility of the soil and its significance in soil science—A review 223

H. Ghadiri and D. Payne. Raindrop impact stress and the breakdown of soil crumbs 247

F. Cabrera and O. Talibudeen. Effect of soil pH and organic matter on labile aluminium in soils under permanent grass 259

Bijay Singh and G. S. Sekhon. Adsorption, desorption, and solubility relationships of lead and cadmium in some alkaline soils 271

S. R. Poonia and O. Talibudeen. Sodium-calcium exchange equilibria in salt-affected and normal soils 276

CONTENTS

R. L. Parfitt, A. R. Fraser, and V. C. Farmer. Adsorption on hydrous oxides. III. Fulvic acid and humic acid on goethite, gibbsite, and imogolite 289

R. L. Parfitt and J. D. Russell. Adsorption on hydrous oxides. IV. Mechanisms of adsorption of various ions on goethite 297

F. Cabrera, L. Madrid, and P. De Arambarri. Adsorption of phosphate by various oxides: theoretical treatment of the adsorption envelope . . 306

R. E. White and A. W. Taylor. Reactions of soluble phosphate with acid soils: the interpretation of adsorption-desorption isotherms . . . 314

H. Laudelout, L. Germain, P. F. Chabalier, and C. N. Chiang. Computer simulation of loss of fertilizer nitrogen through chemical decomposition of nitrite 329

M. Leistra and W. A. Dekkers. Computed effects of adsorption kinetics on pesticide movement in soils 340

S. Schinas and D. L. Rowell. Lime-induced chlorosis 351

D. J. Linehan. A comparison of the polycarboxylic acids extracted by water from an agricultural top soil with those extracted by alkali 369

N. B. Milestone and A. T. Wilson. Amorphous constituents of some high altitude soils of the South Island of New Zealand 379

Number 3

P. W. Arnold. Soil science and the search for unifying concepts . . 393

R. K. M. Hay. Effects of tillage and direct drilling on soil temperature in winter 403

A. P. Hamblin and D. J. Greenland. Effect of organic constituents and complexed metal ions on aggregate stability of some East Anglian soils . 410

D. S. Jenkinson. Studies on the decomposition of plant material in soil. IV. The effect of rate of addition 417

D. S. Jenkinson. Studies on the decomposition of plant material in soil. V. The effects of plant cover and soil type on the loss of carbon from ^{14}C labelled ryegrass decomposing under field conditions 424

C. Bloomfield and J. R. Sanders. The complexing of copper by humified organic matter from laboratory preparations, soil and peat . . . 435

R. G. McLaren and R. S. Swift. Changes in soil organic sulphur fractions due to the long term cultivation of soils 445

G. Benians, P. Scullion, and G. R. Fitzhugh. Concentrations and activities of ions in solutions displaced from basaltic soils 454

R. Llorca and G. Cruz-Romero. Hydrolysis reactions in sodium-montmorillonite suspensions 462

P. Corcoran, M. G. Jarvis, D. Mackney, and K. W. Stevens. Soil corrosiveness in South Oxfordshire 473

S. J. Richardson and J. Smith. Peat wastage in the East Anglian fens . 485

Ward Chesworth. Weathering stages of the common igneous rocks, index minerals and mineral assemblages at the surface of the earth . . . 490

CONTENTS

C. P. MURPHY, P. BULLOCK, and R. H. TURNER. The measurement and characterisation of voids in soil thin sections by image analysis. Part I. Principles and techniques 498

C. P. MURPHY, P. BULLOCK, and K. J. BISWELL. The measurement and characterisation of voids in soil thin sections by image analysis. Part II. Applications. 509

J. C. F. TEDROW and G. F. WALTON. Rendzina formation on Bathurst Island 519

Number 4

G. P. LAWRENCE. Measurement of pore sizes in fine-textured soils: A review of existing techniques 527

J. V. STAFFORD and D. W. TANNER. The frictional characteristics of steel sliding on soil 541

T. M. ADDISCOTT. A simple computer model for leaching in structured soils 554

J. A. I. OMUETI and ROBERT L. JONES. Fluoride adsorption by Illinois soils 564

J. P. ANDRÉ and L. PIJAROWSKI. Cation exchange properties of sphagnum peat: Exchange between two cations and protons 573

J. C. RYDEN, J. R. MCLAUGHLIN and J. K. SYERS. Time-dependent sorption of phosphate by soils and hydrous ferric oxides 585

J. C. RYDEN and J. K. SYERS. Desorption and isotopic exchange relationships of phosphate sorbed by soils and hydrous ferric oxide gel 596

S. G. de BUSSETTI, E. A. FERREIRO and A. K. HELMY. Isotopic exchange of phosphate on some phosphatic compounds 610

H. A. ANDERSON, A. R. FRASER, A. HEPBURN and J. D. RUSSELL. Chemical and infrared spectroscopic studies of fulvic acid fractions from a podzol . . 623

H. A. ANDERSON and A. HEPBURN. Fractionation of humic acid by gel permeation chromatography 634

M. A. WILSON and K. M. GOH. Proton-decoupled pulse Fourier-transform ^{13}C magnetic resonance of soil organic matter 645

TERUO HIGASHI and KOJI WADA. Size fractionation, dissolution analysis, and infra-red spectroscopy of humus complexes in Ando soils 653

J. P. WATSON. Theuse of mounds of the termite *Macrotermes falciger* (Gerstäcker) as a soil amendment 664
